Insulation Pins With Perforated Base Plate

Insulation fastening solutions for concrete and masonry, suitable for insulation materials such as mineral wool, EPS, XPS and fibreglass
An all metal fire resistant anchor that is both fast and easy to install
Suitable for fixing all types of insulation to concrete, brick, stone or block base material.
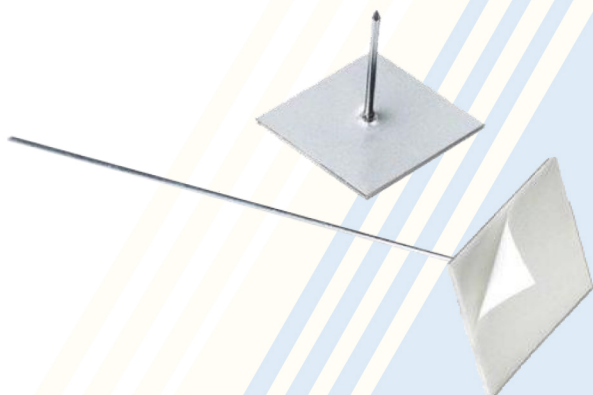

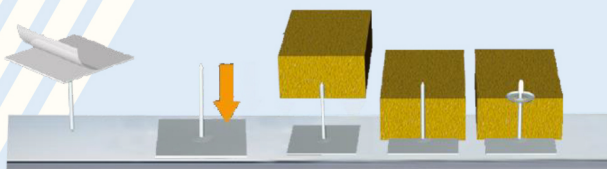

Texture	Baseplate: Tinned iron sheet, Low Carbon Steel Pin: Aluminum or iron
Configuration	Fixing pin with perforated base plate and safety clip
Square Base	22*22mm, 24*24mm, 30*30mm, 50*50mm
Lengths	19mm-240mm
Safety Clip	30mm(diameter)

Self-adhesive Insulation Pins

Self-adhesive standard insulation pins can be used only on straight, smooth, clean and dry surfaces.
Simply remove the release paper backing, place on the surface and impale the insulation over the pin. The locking clip/washer is then pressed on to the pin to complete the final mechanical joint. Bonding takes place immediately but full strength adherence is achieved after 24 hours.

Texture	Baseplate: Low Carbon Steel, galvanized Pin:Aluminum or iron
Configuration	Fixing pin （Self-Sticking） without perforated base plate and safety clip
Square Base	22*22mm, 24*24mm, 30*30mm, 50*50mm
Lengths	19mm-240mm
Safety Clip	30mm(diameter)
